

ACADEMIA CUATRECASAS

2025

Academia Cuatrecasas

With a certified training program based on excellence, the Academia Cuatrecasas has the ability to support every company and professional in lifelong learning, helping them achieve a wide range of organizational and individual goals.

Academia Cuatrecasas was established in 2019 as an autonomous legal entity, even though it originated from Cuatrecasas, Gonçalves Pereira, an international law firm with 290 professionals in Portugal. It is an independent legal entity aimed at meeting the training needs not only of Cuatrecasas' clients but also of other organizations.

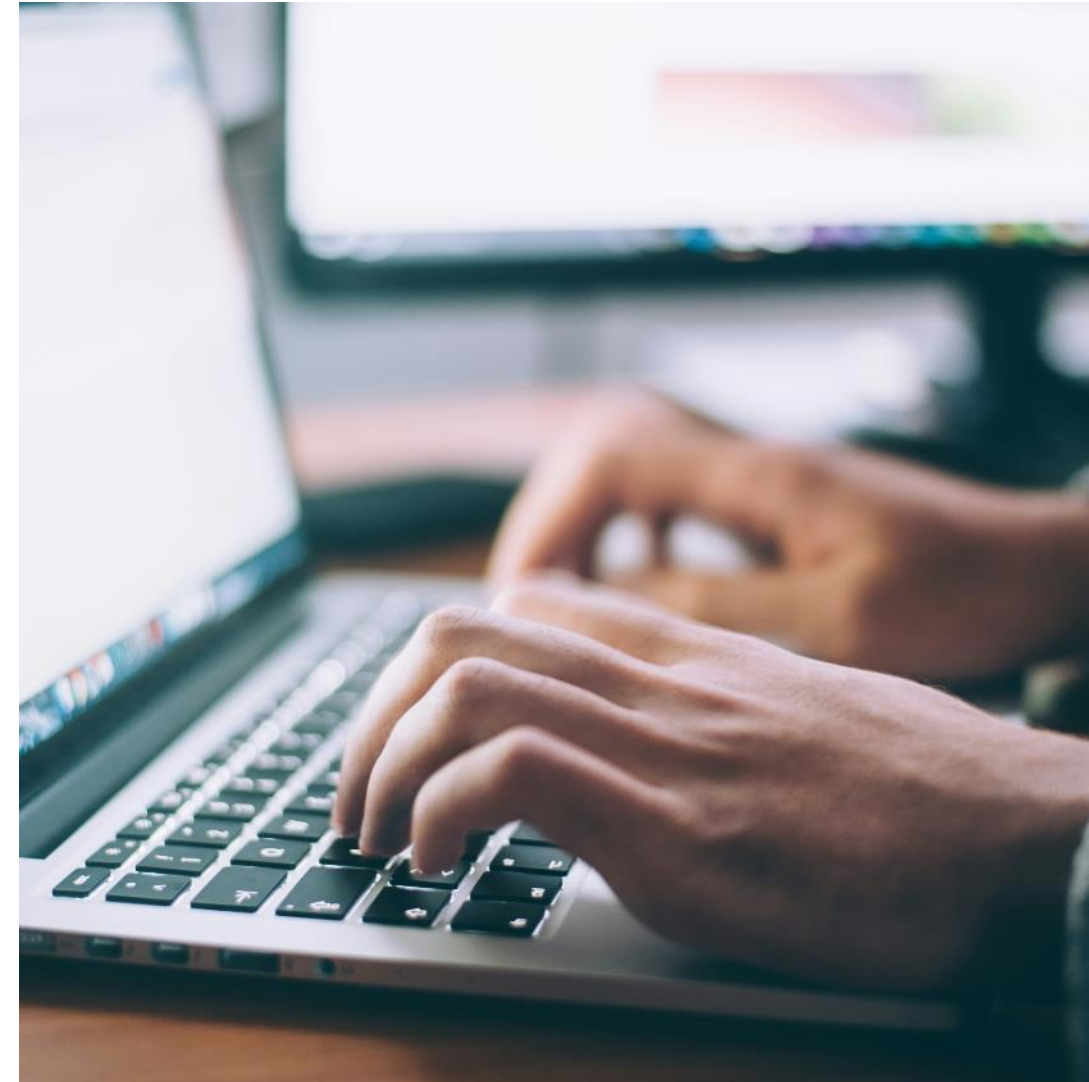

Our mission is to assist both organizations and individuals in developing talent through training, providing them with the opportunity to improve, update, or acquire new knowledge and develop their skills.

Our Goals

The rapid pace of innovation, digital transformation, and market competitiveness to which contemporary companies and institutions are subjected requires the ability to adapt to change constantly. We propose to:

- Support companies in their efforts to adapt to market needs and keep up-to-date with technological developments.
- Foster the professional development of lawyers, attorneys, and other professionals across various sectors of society.
- Promote research in law and build bridges between the academic and professional worlds.

Our Team

We work with experts in the field of pedagogy and have a training team specializing in different areas of law.

- Banking, Finance and Capital Markets
- Compliance
- European Union and Competition Law
- Tax
- Real Estate and Urban Planning
- Employment
- Intellectual Property, Data Protection and Digital Law
- Public Law
- Corporate and Commercial

OUR PRODUCTS

ACADEMIA
CUATRECASAS

Learning Products

We develop and implement innovative and meaningful learning content in different training modalities:

Face-to-face

- Live sessions, with the trainer and trainees present
- Essentially expository and interactive modules
- They can take place at the Academia's premises - Lisbon or Porto - or at the client's premises.

Distance Learning

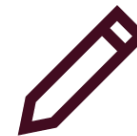

- Using digital tools, courses are delivered without physical presence, making the location flexible and, in the case of eLearning courses, also the calendar and timetable.

Blended Learning

- Combines synchronous and asynchronous sessions
- The trainee goes through the training itinerary alternating between individualized work sessions, group work sessions and private support sessions with the trainer to clarify doubts and go deeper into topics.

Tailor-made training

Legal competences

CATALOG TRAINING

Training courses are developed on relevant and current topics that seek to respond to needs identified by the Academia Cuatrecasas team as being topics that can be worked on across the board.

Sessions can be held inter- or intra-company, depending on the number of participants.

TAILOR-MADE TRAINING

Training courses or actions designed on request to meet the specific needs of each company.

Academia Cuatrecasas develops a professional training proposal that is duly adjusted to your organizational reality and your employees, responding to them in a concrete way.

In the eLearning modality, the trainee manages learning at their own pace, accessing training resources in different formats, such as digital learning experiences developed in Articulate Storyline, webinars (Zoom), videos, slideshows, quizzes, exercises and/or documentation for consultation.
